

WHY?

- You maybe feel stuck
- You possibly feel “out of order”
- You may be in pain on any level

DID YOU KNOW?

- Pain is your body’s warning that something needs attention, much like the red light in your car.
- By listening to these signals it is possible to reverse any deviation from perfect.
- You can return to your intended blueprint.

HOW?

Using many ancient wisdoms, oral traditions and modern knowledge in a guided process of safely untangling what up until now has been your progression into pain and suffering. Your body’s ability to heal itself is awakened and supported.

By improving the circulation of energy, blood, lymph and nerves in your abdomen, many common digestive, urogenital and sacral/pelvic malfunctions can be easily relieved. Very gentle and relaxing, Heather’s decades of combining body and energy techniques may effectively alleviate your tissue congestion and organ constrictions.

All these physical moves are performed externally, gently guiding and supporting all flows to organs, tissues and organs back into their optimal position, towards optimal health and wellness.

HEATHER BRUCE

As the mother of 4 children born from 1977- 1994, Heather has felt challenges in her own life. The birth of her daughter was Heather’s prompt to go well beyond her normal questing. Learning many of the obscure pathways out of severe, serious and apparently hopeless circumstances. If you feel this is also your life story - you have found an ally.

Well known in Brisbane as a natural health care professional and acupuncture consultant, Heather has always used her hands in sessions.

With the addition of the **Maya/Arvigo®** work and Jennifer **Mercier’s abdominal/sacral moves**, Heather has substantially added to her already full healing “toolbox”.

Heather’s Moving Blockages focus is now present in her **Gentling Way /Living Ligaments** courses which she is now teaching internationally.

Come in to discover how these may facilitate your own holistic Soul/ energy /body realignment.
